TARGET

Aspiring to become a solution architect (SA) specializing in scalable systems, DevOps and microservices. Passionate about using .NET and Angular to build high quality applications. Expanding expertise in AI and Blockchain.

SKILL

BE: ASP.NET, .NET Core, Web MVC, Web API, Entity Framework, Dapper.
FE: Angular, React, TypeScript, RxJS, HTML, CSS (SCSS, Tailwind), NextJs.
Database: SQL Server, Indexing, Query, Trigger, Store Procedures.
DevOps: Docker, CI/CD (Jenkins), IIS, SonarQube, Nginx, Azure, AWS.

OTHER SKILL

OOP, SOLID, Design Patterns, DDD, CQRS, RESTful API, JQuery, AJAX, DI, Redux, NgRx, RabbitMQ, Kafka, Hangfire, SignalR, MemoryCache, Redis, WebSockets, Azure, AWS.

SOFT SKILLS

Strong communication.
Listening and conflict resolution.
Logical thinking, problem-solving.
Leadership.

LANGUAGE

English (Intermediate).

EDUCATION

[10/2017 – 12/2021] **FPT University** (Software Engineering)
Graduated with a GPA of 7.2.

EXPERIENCE

[06/2019 – 10/2019] **Waytech** (*Intern*): Developed responsive web applications using HTML, CSS, and JavaScript and ensured UI/UX consistency across multiple screen sizes.

[08/2020 – 12/2020] **FPT Software** (*Intern*): Redesigned Odoo's Inventory Module, improving stock tracking & warehouse operations and enhanced UI/UX, making the system more user-friendly.

[12/2021 – 06/2023] **Sense ERP** (*Fulltack Developer*)**:** Developed & maintained ERP modules, improving business efficiency, coordinating with clients & gathering requirements and optimized system performance.

[08/2023 – 10/2024] **SUNFIX Consulting Vietnam** (*Technical Leader*): Led project planning, server administration and resource management to ensure smooth progress. Integrated new technologies for scalability, maintain coding standards, facilitated collaboration between BA and development teams.

PROJECTS

ERP - Enterprise Resource Planning (8 members**)**
Led web development, selected tech stack, ensured on-time delivery, collaborated with BAs to refine SRS, and identified optimal solutions for the project.
- Position: Fullstack developer.
- Role: Full responsibility for the web application, decision-making on technology stack, ensuring project timelines, and conducting on-site surveys for customer requirements, participate in system design to optimize performance by more than 30%, use AI to refactor source code to make code cleaner, more convention-compliant and logical.
- Technologies*:* .Net 6.0, SQL Server, React, MUI, Tailwind CSS, React Flow, Devextreme, RabbitMQ.

WMS - Warehouse Management (12 members)
A warehouse management system that optimized operations, improved inventory control, order processing, and logistics, and reduced manual errors.
- Position: Technical leader, full-stack developer.
- Role: Optimized database performance, reducing query time by 40%. Implemented real-time inventory tracking with SignalR & Redis. Set up CI/CD pipelines, accelerating deployment by 50%. Conducted code reviews and mentored team members to ensure best practices.
- Technologies: .Net 8.0, SQL Server, Docker, Angular, TailwindCSS, MUI, AG Grid, SignalR, Hangfire, Redis, Kafka, GotIt API, Zalo OA.
